

SpecialtyCare

Simplifying Care, Close to Home

Red Cross Pharmacy cares about you and your health. If you have a chronic condition that you're having trouble managing, let your local pharmacists at Red Cross Pharmacy help. Through our SpecialtyCare program, we'll work with you and your physician to make managing your medications and therapies easier.

SpecialtyCare can help manage these conditions:

- Psoriasis
- Rheumatoid Arthritis
- Crohn's Disease
- Ulcerative Colitis
- Osteoporosis
- Hepatitis
- Multiple Sclerosis
- Oncology

Designed for you

Red Cross Pharmacy's SpecialtyCare provides a whole health approach that helps manage all aspects of chronic, complex conditions. We'll coordinate all of your specialty and non-specialty medication refills at one time. Plus, it's all done by your trusted hometown Red Cross Pharmacy.

Our SpecialtyCare Team will contact you once your prescription is received. The Team will start an insurance benefits investigation process and explore options that may reduce your financial burden, such as co-pay cards and foundation assistance. Once these steps are complete, the SpecialtyCare Team will contact you to coordinate dispensing of medication, training and education, and to schedule follow-up calls for refills and assessment.

Benefits for you

- Face-to-face interaction with local pharmacist
- Convenient medication pickup at local Red Cross Pharmacy location
- Coordination of insurance benefits investigations, co-pay cards and foundation assistance
- Medication-specific education and training
- Coordination of refills for specialty and non-specialty medications
- Medication adherence monitoring
- Option to have medication shipped or delivered
